

ReadiGRAFT®

BLX Sponge

ReadiGRAFT® BLX Sponge is a demineralized cancellous matrix comprised of 100% cancellous bone that maintains natural bone architecture and acts as a conduit for vascular and cellular in-growth.

Brand	<ul style="list-style-type: none"> ReadiGRAFT® BLX Sponge
Clinical Applications	<ul style="list-style-type: none"> Any surgical application that requires bone void filler
Features And Benefits	<ul style="list-style-type: none"> Natural Osteoconductive Scaffold: The natural interconnected porous 3D architecture and increased surface area of demineralized cancellous provides an optimal scaffold for cellular attachment, and proliferation. Bioactive: Contains exposed natural growth factors with Osteoinductive potential. No Carrier: Contain no fillers or carriers commonly used in bone putties and gels. Hydrophilic: Naturally absorbs and retains bioactive fluids like blood, Platelet Rich Plasma (PRP), and Bone Marrow Aspirate (BMA). Biocompatible: Readigraft® BLX Fibers is comprised of 100% natural bone matrix that is remodeled naturally during the bone healing process. Sterile: Sterilized using proprietary and patented Allowash® XG technology. This technology provides a sterility assurance level of 10⁻⁶, without compromising the grafts inherent osteoconductivity or osteoinductive potential Malleable, Elastic, Compressible: When re-hydrated, the product produces a sponge-like effect which allows the graft to be shaped and compressed to fit in and around a variety of boney defects.
